

A close-up photograph of a single, smooth, light blue egg resting in a nest. The nest is constructed from a dense, tangled mass of dry, brownish-yellow grass and straw, with some darker, reddish-brown twigs visible. The lighting is soft, highlighting the texture of the egg and the surrounding nesting material.

## CONSEQUENCE 2.0

Sequel

Milliken™

## INSPIRED. INSPIRING.

Any single piece of a bird's nest is weak. But together, they form a constellation of tiny junctures that, as one, can withstand the strongest winds and the heaviest rain. Consequence 2.0 builds upon a multitude of simple lines to form a design that is textural, dimensional and naturally refined.
