
SISAL EDIT
Milliken

A contemporary take on timeless elegance.

The beauty of natural texture reimagined for contemporary interiors.

Sisal Edit captures the quiet sophistication of woven natural fibres, translating the tactile appeal of sisal, seagrass and jute into a flooring collection designed for today's commercial spaces. Rich in texture, grounded in nature and softened through tonal neutrals, the collection brings warmth, calm and authenticity into the built environment.

Created for designers seeking depth and dimension underfoot, Sisal Edit celebrates the shift toward layered, minimal and biophilic interiors. Subtle organic patterns and earthy colourways work effortlessly across workplace, hospitality and public spaces, creating interiors that feel both elevated and deeply comfortable.

Inspired by artisanal weaving techniques and the imperfect beauty of natural materials, each design in the collection offers its own interpretation of texture and rhythm. From refined linearity to intricate woven expressions, Looma, Zagora and Meela balance aesthetic softness with the durability required for heavy wear environments.

Sisal Edit invites designers to create spaces that feel connected to nature, spaces that encourage wellbeing, inspire calm and deliver timeless appeal. It is a collection where tactility becomes atmosphere, and flooring becomes an integral part of the sensory experience of a space.

A curated collection of three patterns

LOOMA

MEELA
MLA221 | NUTMEG

ZAGORA
ZGA221 | NUTMEG

Looma

A refined interpretation of woven natural fibres, Looma introduces understated movement and tactile depth through its subtle linear texture. Soft yet structured, it creates a calming foundation for interiors seeking warmth, balance and quiet sophistication.

Looma in Nutmeg | LMA221 | Brick (Horizontal) Installation

Left to Right: Looma in Sundown (LMA146) and Tealeaf (LMA212) | Brick (Horizontal) Installation

Looma in Silkroot | LMA218 | Brick (Horizontal) Installation

Meela

Meela delivers a beautifully layered texture with a soft tonal variation that feels both contemporary and timeless. Rich in tactile appeal, it adds depth and comfort to workplaces, hospitality and public interiors while maintaining a refined, elevated aesthetic.

Walkway: Meela in Tealeaf | MLA212 | Monolithic Installation

It takes humans to protect humanity.

Make changes to end climate change.
Design a better future.

M/PACT™
CARBON NEUTRAL PROGRAM

CLIMATE CHANGE IS ONE OF THE GREATEST THREATS FACING HUMANITY, AND WE ARE ALL RESPONSIBLE.

That's why Milliken Floor Covering launched the **M/PACT™** carbon neutral program. Today, our carpet, LVT and entrance flooring tiles are carbon neutral everywhere in the world.

M/PACT™ carbon neutral products offset the raw materials and manufacturing carbon footprint* by using 3rd party Verified Carbon Standard Credits that support renewable energy and carbon reduction technologies to help fight climate change. When you choose M/PACT™ products, you can be sure your choice is carbon neutral.

M/PACT™

M/PACT™

CARBON NEUTRAL PROGRAM

Investment

Today we invest through renewable energy credits, verified carbon offsets, and installing solar power at our Sydney manufacturing facility. We also continue to invest in more efficient manufacturing technologies and in local supply chains.

Materials

We believe material health is essential to enable circularity. The use of materials that don't contain harmful chemicals provides a critical pathway to end-of-life product recycling. Our carpet, LVT and entrance flooring tiles are recyclable.

Dematerialisation

We continue to support the advancement of a circular economy – one that uses less new raw materials and creates less waste. For example, we have created a portfolio of carpet tiles that use less raw material, reducing embodied carbon. We will continue to challenge ourselves and our supply chains to extend innovation in new technologies for dematerialisation.

Manufacturing

We leverage our global manufacturing and local supply chains to minimise carbon emissions. More efficient manufacturing and distribution not only reduces our global carbon footprint, it also has a direct positive impact on the communities we call home.

Wellness

Climate change directly impacts human health and wellness. Pollution. Natural disasters. Droughts. As a founding member of the Well Living Lab and a Well Portfolio Member, we aspire to design products that enhance well-being and quality of life of indoor spaces.

We will continue to do more to lower our carbon footprint.

The M/PACT™ program is long-term, because the fight to stop climate change is a long one. As a global manufacturing company, we have committed to goals that align with the United Nations Sustainable Development Goals, including greenhouse gas emissions reductions. Milliken & Company is one of the first 50 companies in the world to have our net-zero targets verified by Science Based Targets initiative (SBTi). We encourage you to specify carbon neutral products for all of your projects.

Together, we can make a positive **M/PACT™** on the world for generations.

* As calculated and verified scope A1-3 GWP through a ISO14025/ISO14040 compliant LCA and published in third party EPDs.

Milliken

WellBAC®

Milliken WellBAC® open cell foam cushion provides superior durability, appearance retention and cushioning.

UNDERFOOT COMFORT

Up to 24% greater underfoot comfort for enhanced ergonomics whilst standing.

ACOUSTIC VALUES

Up to 50% improved acoustics for quieter, more productive spaces.

INDOOR AIR QUALITY

Enhanced Indoor Air Quality (Green Label Plus™ Certified Low VOC) for improved occupant and installer well-being.

MOISTURE MITIGATION

Industry leading moisture management with non-reactive backings to enhance the installation process, saving time and money.

MATERIAL HEALTH

3rd party Verified Declare™ Red-List Free products for occupant and installer well-being.

CIRCULARITY

100% Recyclable through the Milliken N/XT LIFE™ Circularity Program for both installation waste and end-of-life.

FACE FABRIC
Patterns and structures made up of nylon yarns with our state of the art tufting technology.

PRIMARY BACKING
The face yarn is tufted through a high quality non-woven textile. The structure of the textile holds the yarn in place acting as the primary backing.

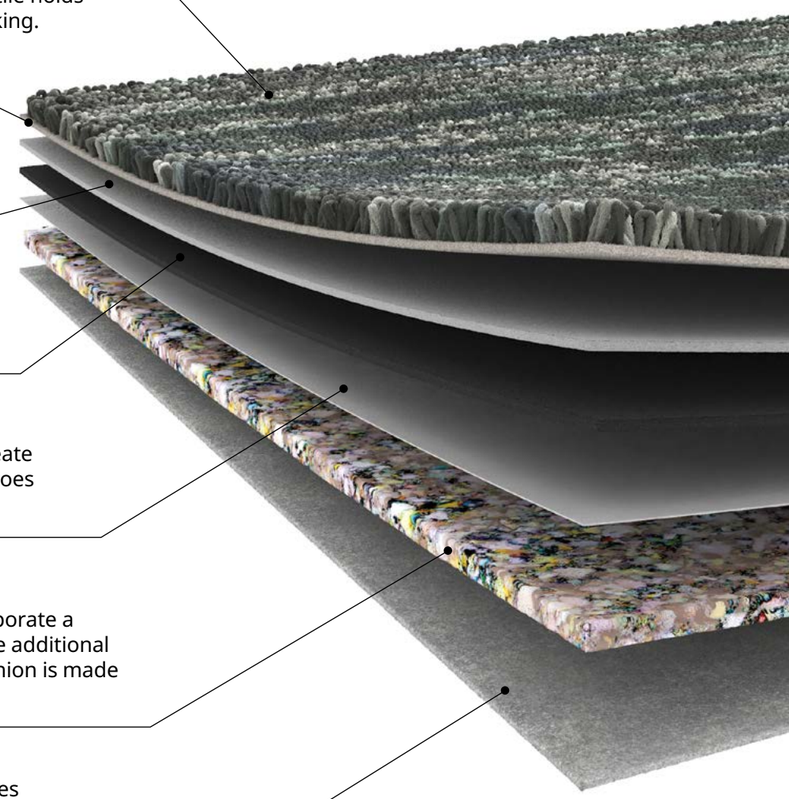

PRECOAT
The precoat layer locks the tufted yarns in the primary backing to ensure good tuft bind strength between the yarns and the backing.

FIBERGLASS
A high quality fiberglass layer is embedded in the polyolefin compound to ensure dimensional stability of the tile.

SECONDARY BACKING
Proprietary Polyolefin compound layer formulated by Milliken R&D scientists to create a durable and stable tile. Our formulation does not contain PVC or plasticizers.

PREMIUM CUSHION
WellBAC® Comfort and Comfort Plus incorporate a premium cushion layer, designed to provide additional health and wellness benefits. Milliken's cushion is made from recycled polyurethane foam.

FELT BACK
A protective non-woven textile layer provides a breathable non-reactive finish. It enhances health and wellness.

Milliken's standard cushion backing system — offering enhanced underfoot comfort, acoustic and wear performance.

CREATING A BETTER WORLD

Milliken supports the Property Industry Foundation

Milliken is a proud partner of the Property Industry Foundation, an organisation devoted to alleviating the problem of youth homelessness. The Foundation builds homes for homeless youth and provides ongoing support for homes where young people can rebuild their lives.

Homelessness is one of the most severe forms of disadvantage and social exclusion that any young person can experience. Youth homelessness affects 44,000 young Australians every night and understanding the scale of this issue, we were compelled to get involved and help in the great work the foundation is doing.

The Sisal Edit collection is part of the ‘Product Pathway’. The ‘Product Pathway’ is a unique fundraising model created by Milliken for the Property Industry Foundation where a contribution from every dollar of sales is donated to the foundation to build homes for homeless youth. The aim of the product pathway is to provide a regular and sustainable fundraising stream and with your help, we can keep assisting the Property Industry Foundation in tackling the issue of youth homelessness.

The Foundation’s mission is to make a tangible difference to the serious and persistent problem of youth homelessness by partnering with respected charities to build safe environments and support charity managed initiatives focused on education, employment and well-being.
