PASSAGE

ILLUMINATING A PATH FORWARD

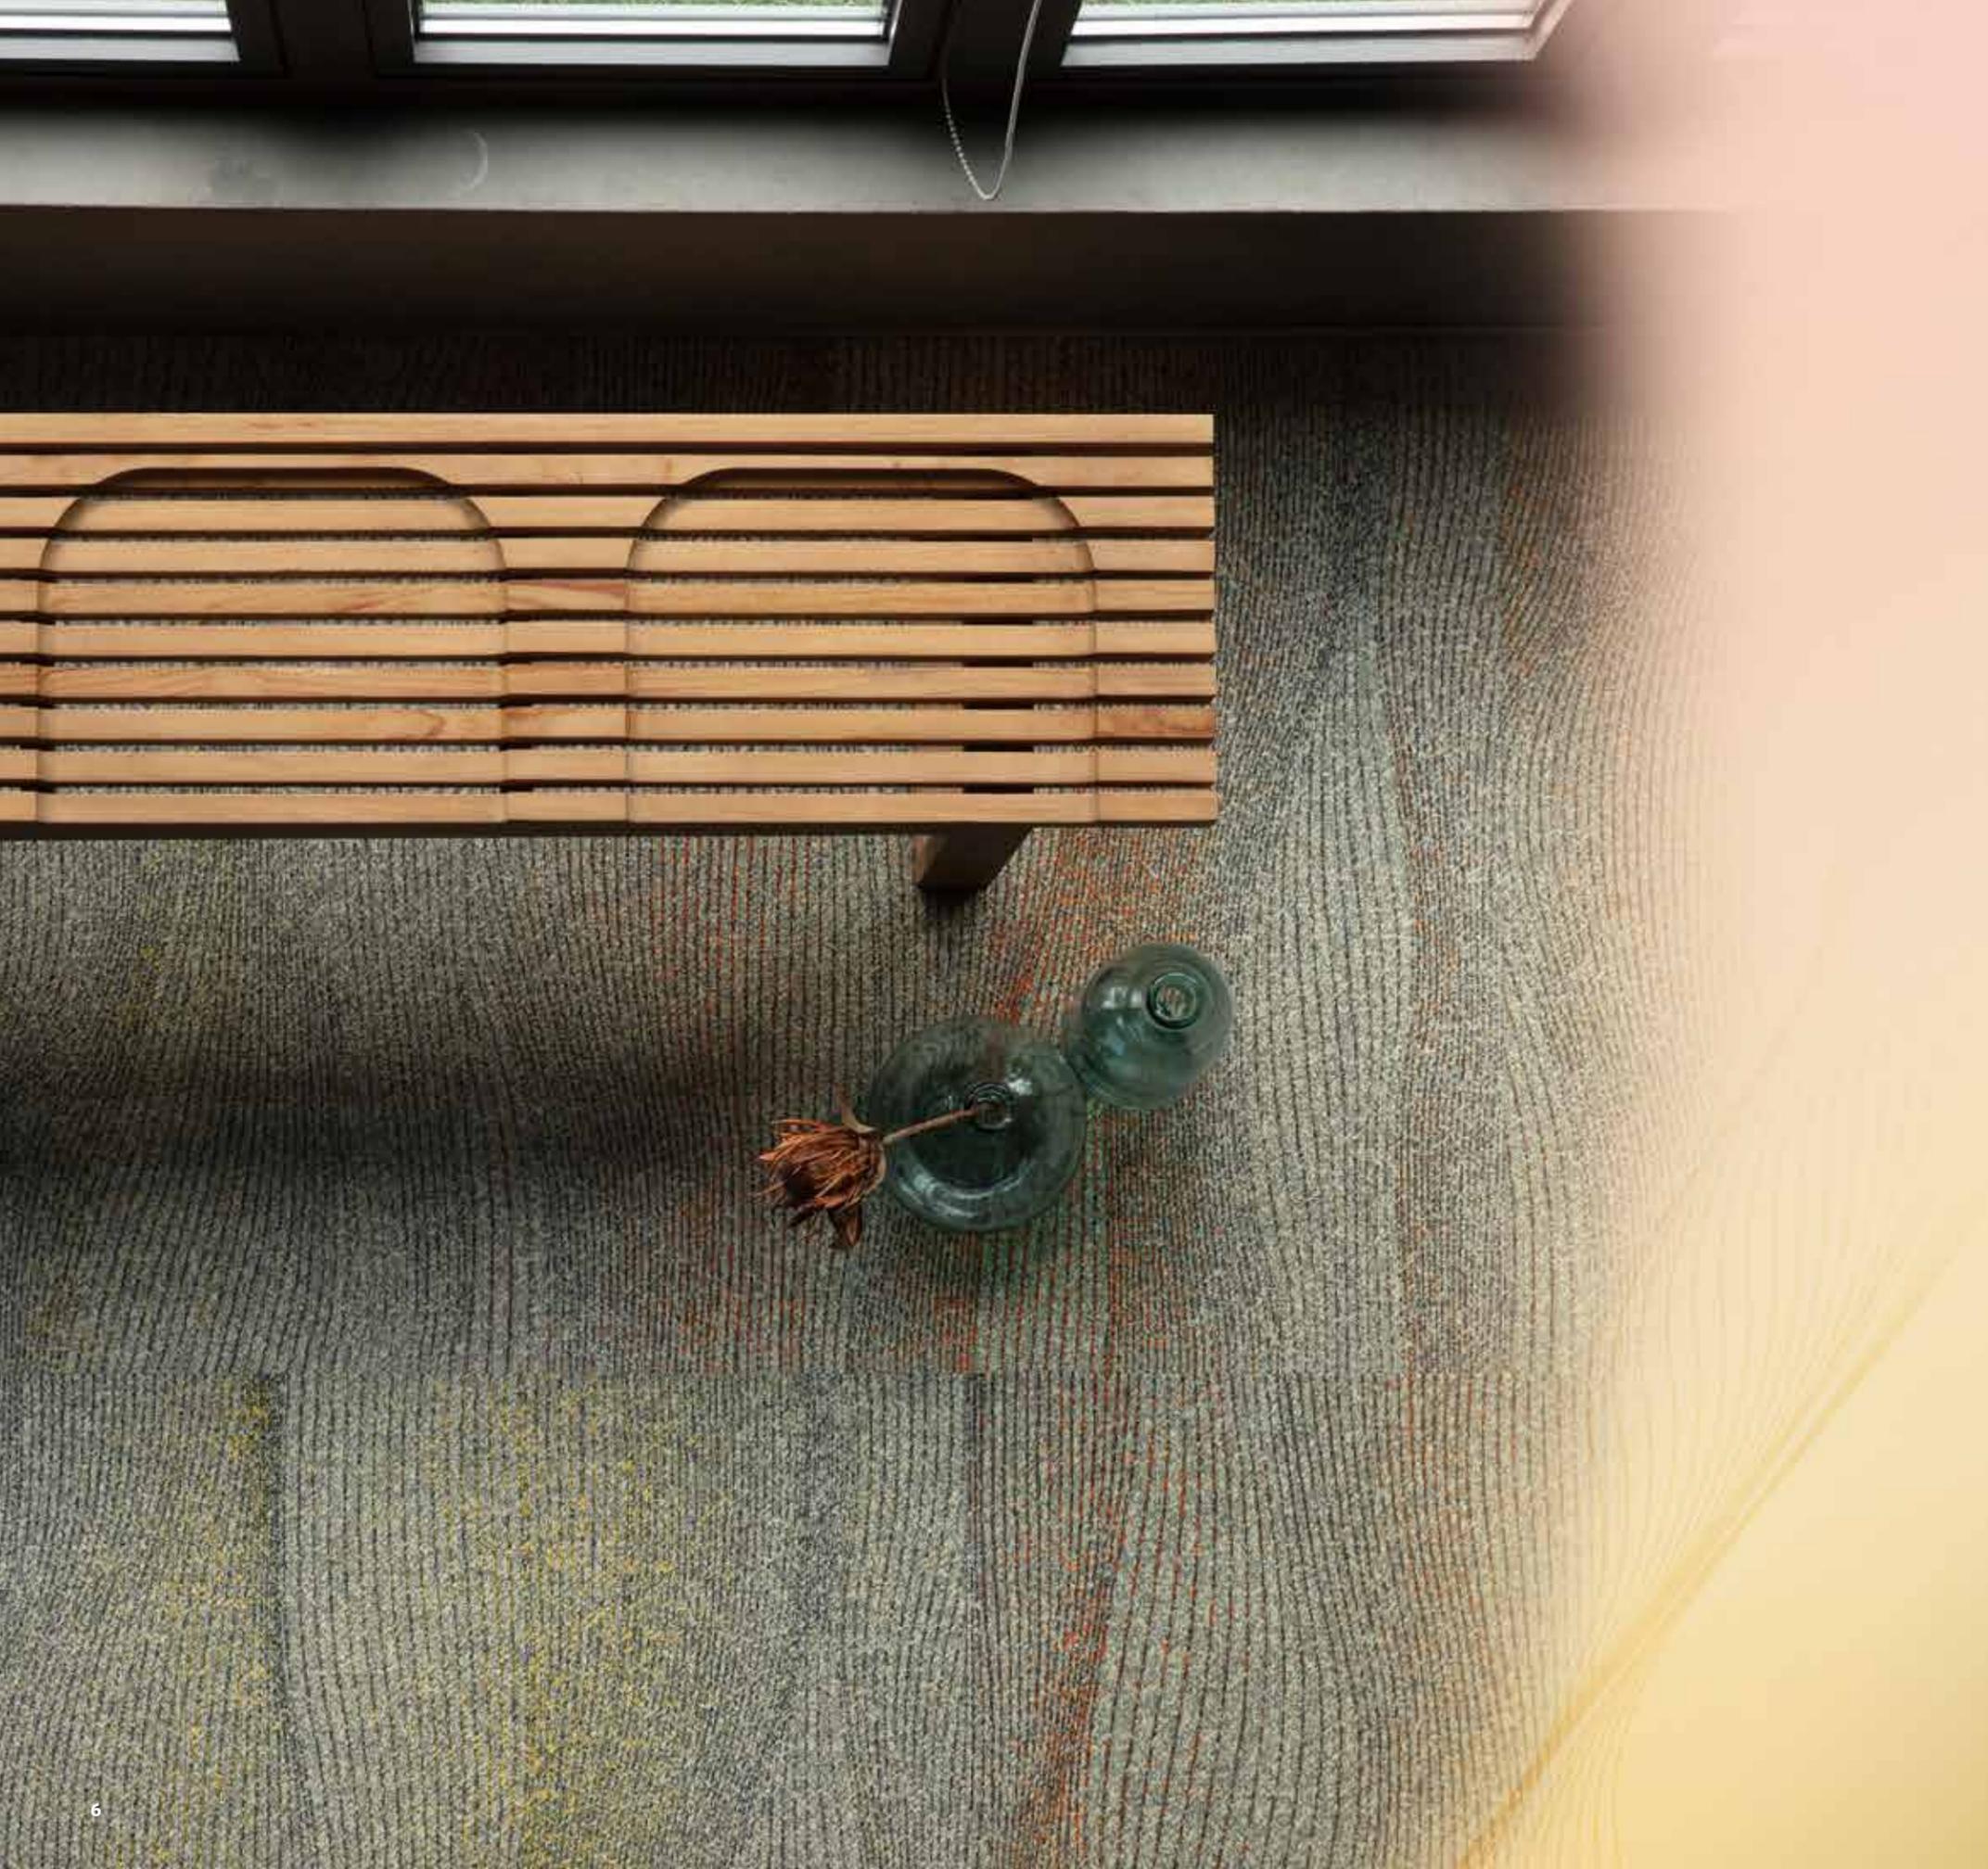

Light reaches us in a multitude of ways: brightly, dimly, or in ways that are not even visible to the naked eye. By drawing attention to textures, colors, and forms through light, it helps to achieve the true purpose of any given space. It invigorates and winds you down; it heightens our creativity as well as dampens our productivity; it sets the tone of how we react to the external world. It can bring emotional value — and helps create an experience for those who occupy the space.

The Milliken Passage collection echoes with light, through its direction, intensity, color and contrast; maximizing the environment's function and purpose. From speckles of dusts to fluid directional movements, the patterns flawlessly create a visual passage, radiating a glow that, not only enlivens, but also create an aesthetic journey. An experience to be created through layered illumination of patterns and objects.

We welcome you on the path forward.
